AutoCAD is also compatible with other software from Autodesk, such as Design 360, its product for 3D modeling; ConceptDraw Project, a project-planning tool; and LayOut, a tool for 2D graphics and web-based presentations. In addition to the core AutoCAD software suite, Autodesk offers a range of complementary software products and services, including professional services, engineering software, and the operation of a subscription-based AutoCAD Training Center. Approximately 75% of Autodesk's revenue is generated by AutoCAD and AutoCAD LT. Sales of AutoCAD software in the U.S. alone, according to Autodesk, were \$389 million in 2017. AutoCAD is the most widely used software application for drafting and visualization in engineering and manufacturing. AutoCAD provides a wide range of capabilities for creating drawings, modeling, and visualizing technical drawings. Since the release of AutoCAD in 1982, the product has been upgraded on a regular basis, with over 75 releases in the last 30 years. From the initial release of AutoCAD as a desktop program to its current release as a web app, AutoCAD has seen significant changes in its underlying technology. Before AutoCAD was introduced, Autodesk (then called International Computers Limited) developed software for engineers and architects to design buildings and industrial structures. In 1975, the first version of AutoCAD was released for the Apple II. The new program was called DRAW. DRAW was improved and renamed as AutoCAD in 1982. AutoCAD is designed to be easy to use. User training is one of the core goals of the AutoCAD product line. Acquisition by Autodesk In 2004, Autodesk acquired a small software firm called PTC, which developed a product called Luxology. the market dynamics over time AutoCAD has a client base which includes both the professionals and end users. AutoCAD has a free version (Autodesk AutoCAD LT) with limited functionality, and a number of subscription options available: standard version, higher function and highest function. The standard version of AutoCAD is bundled with the AutoCAD LT package. AutoCAD LT packages were initially designed for professional users, but now support business and other purposes. It is possible to purchase a combination of standard and LT versions. For example, a user can obtain both a LT package and the Windows desktop version in order to run AutoCAD on a personal computer. Many universities and universities around the world use AutoCAD LT for study purposes and printing/publishing training. Students of many colleges and universities have downloaded free CAD software called Autodesk Fireworks from the AutoDesk website. A combination of Fireworks and AutoCAD LT is available to users. , has sold 4.1 million licenses of AutoCAD and AutoCAD LT. A number of versions of AutoCAD are available for the Apple Macintosh: AutoCAD 2000, 2000e, AutoCAD 2002, and AutoCAD LT. AutoCAD LT was introduced in the AutoCAD 2001 release. This subproject is one of many research subprojects utilizing the resources provided by a Center grant funded by NIH/NCRR. The subproject and investigator (PI) may have received primary funding from another NIH source, and thus could be represented in other CRISP entries. The institution listed is for the Center, which is not necessarily the institution for the investigator. We are interested in the metabolism of steroid hormones such as cortisol and estrogens. We previously studied the NADPH-dependent oxidation of steroid hormones such as cortisol to pregnenolone and the glutathione-dependent oxidation of cortisol to cortisone. In the past year we have studied in detail the NADPH-dependent metabolism of cortisol. The Km of the cortisol dehydrogenase was determined to be 5.5-7.4 mM and the Vmax was 0.1-0.4 U/mg protein. The physiological significance of this enzyme is not yet clear. We are also studying the metabolism of estrogens.

List of American League left fielders by batting average

In Major League Baseball, there is often a premium on batting average as one of the three components of the batting average formula:  $\text{Batting average} = (\text{number of base hits}) / (\text{number of at-bats})$

In the American League (AL), the batting average of the left fielders has been much higher than that of the outfielders in general. From 1920 to 1966 the average AL left fielder hit .288, compared to .226 for all AL outfielders. The left fielders' average was .285 from 1968 to 1972. Since 1974 the left fielders' average has remained .274. In the National League (NL), the batting average of the left fielders has been much lower than that of the outfielders in general.
