Clash Of Clan Attack Simulator

In Clash of Clans, you must navigate your village to attack enemy villages. But in order to get battle plans of our village, we have to spend our hard earned gold for the Gold Attack Plan which is pay at that villager's and get their attack plans. Then when we should attack our target village, we have to tap on that village to attack him and the battle plans show up on a transparent tile. And after that time, we can attack the village at any time and the action must complete before the attack plan expires. But the issue we are facing is that we want to get those attack plans in numbers for planning attacks against many villages. But they can only share one plan at a time. * The author of this app downloaded this tool and give permission to generate these plans for the readers. Clash of Clan Attack Plan Tool My objective is to create a Clash of Clan attack simulator that allows its user to see the attack plans and chances of success of the attacks and place multiple units at the same time and lots of units in battle plans. And it will also allow the user to have ability to modify the units and spells. * Another way to find attack plans and get plans is to pay for the Gold Attack Plan that requires more gold than normal attack plan. So consider buying it while the plan is not available. Because I am a Clash of Clans noob, I made this app for Clash of Clans users so that they can create their own attack plans and share with their friends and also have fun in planning against villages Clash of Clan Attack Simulator/Planner Setup your village & check chances of attack Select your target village Tap the attack button and select the attack style. Check the attack plan for your target village (click on a blank tile to view) Tap to place your units Tap to place your spells If the attack plan expires, the attack plan will be cancelled * The author of this app downloaded this tool and give permission to generate these plans for the readers. Clash of Clan Attack Simulator/Planner Ultimate Tower Defense Simulator Finally finished my Ultimate Tower Defense Simulator. With this simulator, you can use any tower and defensive units against any tower attack. It simulates the attacking on the tower, the movement of the units, the attack damage to the base, as well as the range of the tower. * The author of this app downloaded this tool and give permission to generate these plans for the readers. 3da54e8ca3
