The Little Launcher is a tiny, free application that's easy to use and quick to access. Whether you're on a laptop or a desktop, you'll never run out of programs on your computer again. As an alternative to the Start menu, this tiny application comes with a quick and effective method of launching any program on your computer. Looking for a way to save some time on your desktop? Then, you should take a look at this program called DU Meter. In it, you'll be able to check the resource usage of various programs on your computer, for instance the CPU, RAM and Disk usage. You can also analyze the hard drive performance and the system folder. With the advanced options, you can even set a schedule to start the monitor on a specific time. How to install DU Meter: DU Meter is a Windows application, therefore you need to install it first on your computer. To do that, launch the Windows Start menu and type the "DU Meter" in the search box. Then, select the application that's located on the first result, the "Software Development Kit" (SDK). Click the "Install" button on the next page to start the installation process. Once the process is done, launch the software and click the "Update" option on the upper left corner of the main interface to update the program. Then, click the "Open" button to launch the program. DU Meter – Advanced Options: The program comes with various advanced options. They are located on the main interface, in the "Tools" tab. The "Utilities" tab contains options that are rarely used. The "Analyze" option lets you choose how the program will analyze your computer's resource usage. With the check box, you can choose to check the CPU, RAM and hard disk usage. You can also specify how the data should be shown in a table format. Then, you can choose whether to ignore the free disk space or not, to display all or only the recent data. You can also set a limit to the data. To do that, you can set the amount of MB or the gigabytes. To find out the amount, you can open the "Calculator" option, from the "Tools" tab. If you want to view the system folders, you can check the "

The Little Launcher Crack+

For Windows users who don't want to waste time navigating through the Control Panel every time they need to change their keyboard settings, try KEYMACRO, a handy utility that enables quick access to the most commonly used key settings. The application is pretty simple and straightforward, with a typical Layout tab for adjusting key combinations and separate Categories for frequently used keys. To access the settings, there's an option to enter keys manually, and the top-most bar allows you to do that. Other options include adjusting Caps Lock, entering dead keys, and changing auto-correct dictionary and accents settings. Can be used on the go KEYMACRO isn't exactly an app that needs to be installed, as the executable is about 1.4MB in size. Moreover, it loads quickly and doesn't require additional configurations or changes to function. As a matter of fact, the application automatically adjusts the default location for the keys and reverts it back to its original position when exiting. In short If you're looking for a quick and clean tool that you can use while on the go, KEYMACRO might be exactly what you're looking for. As it loads fairly quickly, it might be a good idea to set up key combos when not using the application. Pressmania.com is an independent online magazine for tech enthusiasts and tech enthusiasts. We cover a range of international news and stories that you can read on the go and share with your friends. Join our community to stay updated. The Home Cookin' Cookbook The Home Cookin' Cookbook is a 1982 cookbook by Helen Evans. Contents The book contains sections on entrees, soups and stews, sauces, vegetables, desserts, salads, and snacks. The recipes are divided into 16 main chapters and 24 sub-chapters, and have accompanying photographs. Reception The New York Times review by the journalist Robert Doty praised its "fresh and lovely" design. He noted that the book "is not as filling as some, but it does have enough to keep a hungry group of five or six people going for the whole day. And I'll also have one for lunch. With two. Or three."
