The call to Data[x, y] returns a reference to the 4th row, 1st column pixel. You then change the contents of the pixel, and the change is reflected by the original Data array. Example: string s = "Hello"; int i = 5; Console.WriteLine(s); // Output: Hello Console.WriteLine(i); // Output: 5 s = "World"; Console.WriteLine(i); // Output: 5 A: It's a reference.
