Hitman Blood Money Pc Game Highly Compressed Free Download.Q: How to compile header only libraries with CMake? I'm trying to develop a library in C++11 and C++14 which only contains a header file. I would like to be able to generate Makefiles for CMake so that I can compile the library into a single shared object. I do not need any

additional static or dynamic libraries. I'm aware of the LGPL and its requirements, so I'm not relying on that, I'm just relying on the fact that I need to generate a single object. I have looked into the CMAKE_TOOLCHAIN_FILE generator option and I also looked into the CMake UseLegacy and CMakeFindBinUtils generator options. With the first option, all I get is a lot of errors like: CMake Error at CMakeLists.txt:2 (PROJECT): Unknown CMake command "PROJECT_LABEL" With the second option, all I get is: CMake Error at CMakeLists.txt:11 (USE_PROGRAM): Use of uninitialized value \$ in /usr/local/Cellar/cmake/3.3.2/share/cmake-3.3/Modules/CMakeProgramInformation.cmake, line 35. CMake Error at CMakeLists.txt:21 (CMAKE_AR): Could not create directory "/Users/.../build/release/libmyLibrary" Which seems to indicate that the code is trying to access the absolute path of the build directory, which I understand makes sense given how I am invoking the generator (or, rather, my invocation of it
